ENVIRONMENTAL POLICY

Blue Cedar Tree Surgeons are committed to minimising the impact of its operations on the local and global environment. We take all possible steps to prevent pollution, damage and disruption to wildlife and their habitats and to reduce our carbon footprint.

WASTE

We aim to minimise waste and recycle wherever possible. All larger timber is either logged for fuel, taken to the sawmill for planking or kept for the local wood turners. All smaller brushwood is fed through our chipper which can then be used as a mulch.

WILDLIFE & HABITAT

We are very conscious that, on a daily basis, we are working in areas which house all sorts of wildlife. Blue Cedar Tree Surgeons undertake a habitat disturbance assessment before work commences on a new site and we work within the guidelines set out in the Wildlife & Countryside Act 1981 and the Countryside & Rights of Way Act 2000.

CARBON FOOTPRINT

All our vehicles and machinery are regularly serviced to ensure maximum efficiency and fuel economy.

We plan our journeys in advance to minimise our distance covered and try to fit jobs together to save unnecessary second trips. Machines are not left idling while not in use.

E-mail is the preferred use of contact and we try to minimise the use of paper.
